

WEATHERMAKER® 9300TS – 58MTA

GAS FURNACE WITH COMFORTHEAT™ TECHNOLOGY

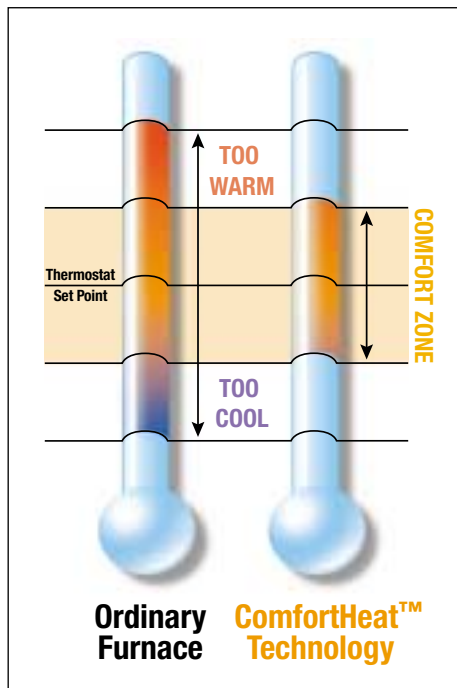

ComfortHeat
TECHNOLOGY

EXTRA COMFORT AND UP TO 93% AFUE EFFICIENCY

CARRIER DELIVERS ENHANCED INDOOR WEATHER WITH COMFORTHEAT™ TECHNOLOGY.

HEATING PERFORMANCE

Carrier's WeatherMaker® 9300TS gas furnace provides even, consistent heating temperatures for enhanced indoor weather during the cold, winter months. Just as the name implies, ComfortHeat™ Technology provides a more comfortable type of heating than ordinary furnaces. With two stages of heating and intelligent comfort control, the WeatherMaker 9300TS can deliver heated air at a more consistent level. Low-stage heating helps maintain optimum efficiency and comfort by minimizing up-and-down temperature swings as well as the hot and cold areas associated with ordinary furnaces. When additional heating is necessary at start-up or during extreme winter conditions, the smart control automatically adjusts to high-stage heating to quickly meet and maintain the comfort you deserve.

ComfortHeat™ TECHNOLOGY

ComfortHeat Technology helps you stay in your comfort zone by keeping your indoor temperature closer to your thermostat's setting. Ordinary furnaces may allow larger and very noticeable temperature fluctuations. Carrier's ComfortFan™ gives you even more control of your indoor comfort by allowing you to select your continuous fan speed at the thermostat. You have 3 selections—choose the one that is best for you and your family.

Carrier's thermostats maximize the performance of Carrier indoor weather systems. Ask your dealer for more detailed information.

INDOOR AIR QUALITY

The WeatherMaker 9300TS provides the additional benefit of improved indoor air quality. With low-stage heating cycles that last about 40% longer than ordinary furnace heating cycles, the WeatherMaker 9300TS circulates conditioned air more continuously throughout your home and your comfort system. That means the air passes through your furnace filter for longer periods of time to provide cleaner air inside your home. Adding a higher efficiency Carrier air filter to your air cleaner cabinet can help maximize the air cleaning qualities of this system.

EFFICIENT, RELIABLE PERFORMANCE CREATES A LASTING VALUE.

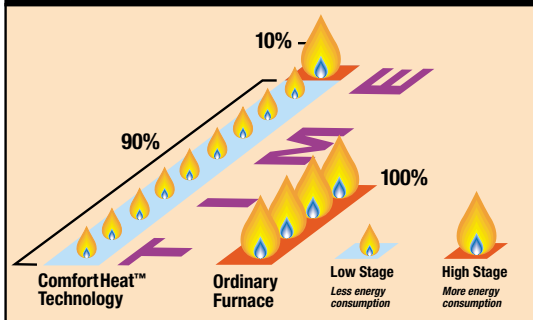

ECONOMY

With Carrier's condensing furnace technology, the WeatherMaker® 9300TS offers penny-pinching performance most furnaces simply can't match. To achieve up to 93% AFUE (Annual Fuel Utilization Efficiency), this furnace utilizes two heat exchangers. Our primary, Super-S™ heat exchanger converts up to 80% of the heat from furnace operation into useable heat. Then, our secondary heat exchanger converts up to an additional 13% more useable heat for your home. Carrier's ComfortHeat™ Technology takes care of the rest, using a "smart" control board which monitors the needs of your home and makes adjustments to achieve the highest amount of comfort using the least amount of energy. Typically, your WeatherMaker 9300TS will operate on low-stage heating for 90% of its operational time to deliver maximum comfort.

Be sure to ask your Carrier dealer about products that use Puron, the new environmentally sound refrigerant.

EQUIPMENT PEAK CAPACITY IS SELDOM NEEDED

The WeatherMaker 9300TS operates at a low-stage of heating 90% of the time. This low-stage operation improves comfort over typical furnaces by minimizing temperature swings, drafts, and hot and cold spots.

WARRANTY

Carrier takes pride in offering the best indoor weather equipment available. In fact, we offer a **limited lifetime warranty** on the heat exchangers. The entire WeatherMaker 9300TS is covered by a **five-year warranty**. Ask your Carrier dealer about extended warranties.

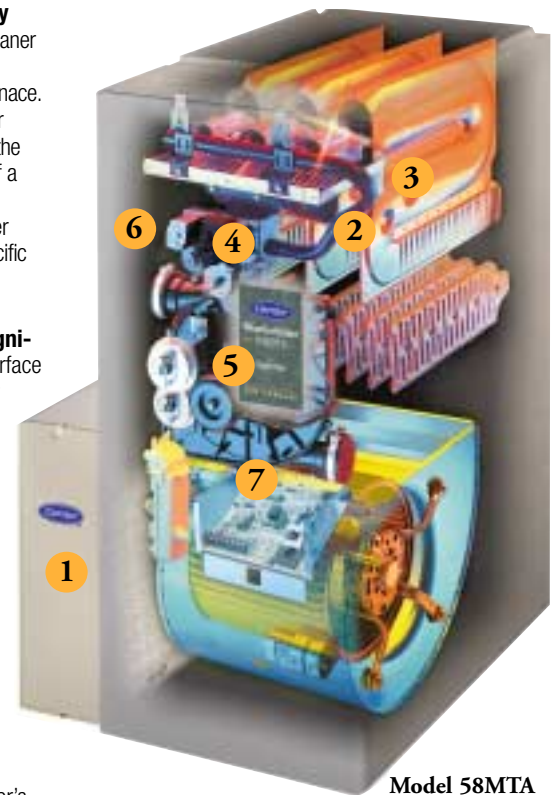

RELIABILITY

Naturally, one of the keys to your comfort is knowing you've chosen a product you can depend on. The WeatherMaker 9300TS offers solid construction and proven indoor weather components. Our primary heat exchangers resist corrosion with aluminized steel, crimped seam construction, backed with a lifetime limited warranty. The secondary heat exchangers are coated with our patented Serpentuff™ polypropylene

laminate for additional corrosion resistance. Hot surface ignition safely and efficiently starts the heating process with more reliability than traditional pilot systems. Our sealed combustion system uses outside air to help eliminate drafts and provide long furnace life. All of these features, along with Carrier's reliability testing, help ensure the quality of every product we make. And, they help make the WeatherMaker 9300TS an excellent choice for enhanced indoor weather.

PERFORMANCE

- Enhanced indoor air quality** is made easier with our air cleaner cabinet, an accessory for the WeatherMaker 9300TS gas furnace. When installed as a part of your system, this cabinet allows for the easy and convenient addition of a Carrier high-efficiency air filter. Ask your dealer if the air cleaner cabinet will work with your specific application.
- Reliable, efficient burner ignition** is provided by the hot surface ignitor. The hot surface ignitor conserves gas because there is no standing pilot.
- Up To 93% AFUE efficiency and lasting performance** are assured through the use of two heat exchangers. Carrier's Super-S heat exchanger extracts about 80% of the heat from the gas you use, then the secondary heat exchanger extracts up to an additional 13%. The secondary heat exchanger also features Carrier's Serpentuff™ polypropylene laminate for lasting corrosion resistance.
- Enhanced comfort** with two stages of heating is made possible with our two-stage gas valve. Low-stage heating increases comfort on milder days. High-stage heating ensures comfort during extreme outdoor weather conditions.

Model 58MTA

- Efficient heat transfer** is assured by the two-speed inducer, which directs the flow of air through the heat exchangers for improved performance.
- Drafts and cold air infiltration are minimized** with our sealed combustion system.
- Custom comfort control** with our patented smart control board ensures the best combination of extra comfort with maximum economy.

CARRIER INDOOR WEATHER SYSTEMS OFFER UNMATCHED PERFORMANCE.

GAS FURNACE & AIR CONDITIONING SYSTEM

Humidifier

As part of a total indoor weather system, a Carrier humidifier replenishes moisture to dry air.

Evaporator Coil

A Carrier evaporator coil is matched with the proper outdoor unit to provide top cooling efficiency and years of reliable service.

Furnace

Carrier offers a complete line of gas furnaces, including the WeatherMaker® 9300TS with ComfortHeat™ Technology.

Air Cleaner

Carrier air cleaners can substantially improve your indoor weather by removing harmful and irritating airborne pollutants from your home.

Air Conditioner

Carrier's complete line of air conditioners provides reliable, high-efficiency cooling for long-lasting comfort and energy savings. Ask your dealer about environmentally sound Carrier air conditioners with Puron® refrigerant.

Zoning

Comfort zoning allows you to set different temperatures for different areas of your home. Enjoy greater comfort and energy savings with room-to-room temperature control.

Comfort Ventilator

Carrier's comfort ventilator adds a breath of fresh air to today's tightly constructed home. It combines fresh outdoor air with conditioned indoor air to economically improve air quality.

Thermidistat™ Control

A Carrier Thermidistat Control is your command center. Precise temperature control and programmable features keep you in touch with your comfort.

MATCHING COMPONENTS PROVIDE OPTIMUM COMFORT, EFFICIENCY AND PERFORMANCE

- Forced-air systems are usually built around an indoor unit, such as a furnace or a fan coil.
- The outdoor unit will be an air conditioner or heat pump combined with a furnace for year-round comfort.
- Air quality is greatly improved with the addition of an air cleaner, humidifier, and a ventilator.
- Precise temperature control comes from a Carrier thermostat matched to your indoor weather system.
- Zoning provides the ultimate in control over your custom made indoor weather system.

EXPERTISE

Your Carrier dealer offers the knowledge and experience needed to become part of a nationwide network of independent Carrier dealers.

Your local Carrier dealer can analyze your needs and the physical requirements of your home, then recommend a matched system of Carrier products that best fits all of the parameters involved. For enhanced heating comfort, that recommendation will

likely include the WeatherMaker® 9300TS gas furnace. It's a formula for success that has helped homeowners like you enjoy the very best in comfort, efficiency and reliability since 1902.
